

Product designer with 8+ years of experience in end-to-end mobile and web UX/UI across iOS and Android, design systems, and AI-native design workflows. Increased conversion from 3% to 24% and drove approximately 10M SEK in revenue through research-led consumer products. Founding-designer experience taking products from 0 to 1 and accelerating design-to-development cycles by over 50% in close partnership with product management and engineering.

WORK HISTORY

HP-appen - Head of Product (UX Lead/Founding Designer, till Dec 2025)

December 2022 - Present

- Founding designer for an AI-native EdTech SaaS product, owning end-to-end product design across core user journeys, onboarding, activation, and platform foundations.
- Increased conversion from 3% to 24% and generated approximately 10M SEK in seasonal revenue by translating ambiguous product and user needs into high-impact experiences.
- Built and scaled a unified design system and reusable component library, improving UI consistency and reducing sprint cycles by more than 50%.
- Integrated AI-native workflows using Figma MCP, Lovable, and Claude to accelerate prototyping and move from concept to production with less friction.
- Shaped product direction and mentored designers, establishing structured design processes in a fast-moving startup environment.

Zomato - UI/Marketing Designer

August 2021 - November 2021

- Designed for a large-scale consumer platform serving millions of users, improving UI consistency and engagement across high-traffic surfaces.
- Delivered marketing and product visuals to demanding quality standards in a fast-paced product environment.

Agrivator - Design Lead - UI/UX, Product and Marketing

June 2020 - July 2021

- Led product design at an early-stage startup, owning the full journey from user research and problem framing to shipped product.
- Reduced bounce rate by 28% and increased user satisfaction by 45% through rapid iteration, stronger UX foundations, and close engineering collaboration.
- Simplified complex workflows for low-digital-literacy users by identifying behavioral patterns and translating them into clearer, more scalable experiences.
- Established reusable design patterns and systems that improved quality and reduced release cycles by 40%.

IEEE - Designer (UI/UX/Communication)

January 2018 - December 2020

- Led digital and brand design across web and communication surfaces, improving clarity, consistency, and visual quality.
- Supported team growth through mentorship and improved design processes.

Freelance - UI/UX/Product/Digital Designer(Contract)

January 2014 - December 2022

- Delivered end-to-end design for 30+ products across SaaS, fintech, e-commerce, and consumer sectors, frequently in zero-to-one and highly ambiguous contexts.
- Partnered directly with founders and developers to shape product strategy, prototype rapidly, and ship solutions with measurable business impact.
- Built scalable design systems and repeatable workflows that helped small teams ship faster without losing craft.

CERTIFICATES AND EDUCATION

Product Ideation, Design, and Management - University of Maryland 

2025

UX Design Specialization - Google 

2025

MS Media Technology – Linnaeus University 

2022 - 2024

B.Tech Computer Science – RIT Kottayam

2017 - 2021
